

# INSPIRATION. KNOWLEDGE. SUPPORT. INNOVATION. PROMOTION.

## SCNZ is the voice of New Zealand's diverse steel industry.

SCNZ offers support, design tools, and information to builders, engineers, architects, fabricators and quantity surveyors.

We promote the benefits of steel solutions in building and infrastructure projects; and play a pivotal role in supporting the industry as it strives to grow through innovation, investment in technology, market development, and advocacy.

We have over 300 members nationwide. Our membership represents the whole supply chain, from manufacturers of structural steel and steel products, to distributors, fabricators, designers, detailers, galvanisers, and paint and building supply companies.

STEEL FABRICATOR CERTIFICATION (SFC)

## SCNZ's Mission:

Advancing the interests of New Zealand's structural steel industry through technical expertise, promotion and facilitating business excellence.

SCNZ runs a number of initiatives which inform the industry on the latest steel design trends and standards, create networking opportunities, and represent views to key industry and government decision-makers:

### Steel Fabricator Certification (SFC) Scheme

SCNZ, along with HERA, is at the forefront of the development of this ground-breaking scheme which has introduced a mark of quality for the local structural steel sector.

As an industry-led quality assurance scheme, SFC provides procurers and specifiers with certainty of product and significantly reduced compliance risk.

### Industry Conferences and Events

Our market-leading conferences and events are unmissable for anyone connected with the industry, offering valuable networking opportunities and enabling the latest design and construction knowledge to be shared.

### Member Events

As an advocate for smarter business, SCNZ runs regular member events which encourage discussion, knowledge sharing and industry vision building, actively supporting our members to grow and evolve.

### Showcasing Steel Solutions

SCNZ promotes the benefits of structural steel solutions for building and infrastructure projects, celebrating excellence through initiatives like the Excellence in Steel Awards.

### SteelCon Careers

To ensure there are sufficient skills and leadership to develop a world class industry, SCNZ spearheads a drive to promote careers and training in the structural steel sector.

### Design Resources and Technical Expertise

SCNZ develops guidance and resources for practising engineers to implement new solutions and technology; and provides a Technical Helpdesk manned by Structural Engineers.

### Compliance

We are committed to ensuring compliant material is used for structural steel projects and work closely with local importers to extend the range of products with third-party certification.

### Standards Development

SCNZ has extensive experience of international standards development and dissemination; with senior representatives sitting on several Australia / New Zealand committees.
