

SCNZ Membership

SCNZ Membership

Over the last 10 years, New Zealand's steel construction industry has undergone a renaissance thanks to substantial investment by local firms in new technologies and management systems, which are revolutionising the construction industry worldwide. Today, thanks to the many beneficial properties of structural steel, its share of the New Zealand multi-level construction market is approximately 50%¹.

Steel Construction New Zealand (SCNZ) aims to educate the country's construction sector – from developers to architects, engineers, quantity surveyors, builders and tenants – about the benefits of building in steel and, in doing so, increase its use in the commercial buildings and infrastructure of today and tomorrow.

Formerly a division of the Heavy Engineering Research Association (HERA), SCNZ became an incorporated society in 2006. While HERA is a pan-metals industry organisation focused on research, SCNZ is dedicated to steel construction and offers technical support and industry advocacy services to its members. One of SCNZ's priorities is to promote the use of locally manufactured structural steel in private sector and government-backed building and infrastructure projects.

SCNZ's membership of over 300 companies represents New Zealand's entire steel construction industry, including manufacturers of structural steel and steel products, distributors, fabricators, erectors, designers, detailers, galvanisers, and paint and building supply companies. Most are small- to medium-sized, owner-operated companies who train, employ and support people from their local communities all over New Zealand.

I encourage you to join SCNZ and enjoy the benefits of belonging to an association dedicated to the advancement of your industry.

Warm regards

Darren O'Riley
SCNZ Manager

Why Join SCNZ?

Advocacy

- Have your views heard and enjoy representation at government level and among key industry influencers.

Networking

- Opportunities to meet with colleagues and prospective clients throughout the industry.

Technical Resources

- Access to highly valued and popular online resources, such as the online Connections Guide.

Education and Professional Advice

- Access to seminars and technical advice, along with guidance on the development of design, fabrication and material supply standards.

Marketing

- Promotional opportunities include SCNZ's on-line directory (www.scnz.org), which showcases the range and quality of New Zealand's structural steel solutions.

Information

- Regular updates on industry news and market developments.

Discounts

- Receive discounts on seminars and publications.

"SCNZ has provided Pegasus Engineering with invaluable advice and design support. I'd encourage any steel fabricator serious about growing and succeeding in the steel construction industry to join SCNZ."

Gavin Lawry, Managing Director, Pegasus Engineering

"It's crucial that the steel construction sector has a strong voice to promote the strength and value of our industry - SCNZ is fulfilling this role admirably. To any steel construction players serious about progressing their business, my advice is simply this: join SCNZ."

David Moore, General Manager, Grayson Engineering

1. SCNZ estimate only, based on available data.

International Steel Supplier General/Other

1. See rules 5.1 and 5.2 for the residency criterion for Full and Associate members. 2. To be eligible for Steel Constructor membership, companies must be certified under the Steel Fabricator Certification (SFC) scheme to at least Construction Category 2 level. For details of the SFC scheme please refer to www.steelfabcert.co.nz. If your application is approved, SCNZ will forward your details to HERA Certification Ltd to begin the SFC Certification process. Please note, that until SFC is achieved, Steel Constructor membership is not granted. 3. Affiliate Members include construction managers, general contractors, building compliance officials, and related industry associations and societies, both in New Zealand and overseas. General Affiliates include any person or corporation operating as a supplier of bolts, light-gauge steelwork, paint, welding consumables, software, machinery and plant used in steel construction.
